UNIFI U7-PRO-XG

UBIQUITI

UNIFI U7-PRO-XG

Περιγραφή

Ubiquiti UniFi U7-Pro-XG is a cutting-edge WiFi 7 access point that delivers outstanding performance and reliability in demanding network environments. With support for three frequency bands (2.4 GHz, 5 GHz, and 6 GHz) and 6-stream (6x6 MU-MIMO) technology, the U7-Pro-XG ensures fast and stable wireless connections, making it ideal for businesses, educational institutions, and high-density locations.

Benefits

The U7-Pro-XG offers a range of features that enhance network quality and performance:

WiFi 7 Support: The latest generation of WiFi technology provides higher throughput, lower latency, and greater efficiency.

10 GbE Port with PoE++: A high-speed 10 GbE RJ45 Ethernet port with PoE++ support enables high bandwidth and simplified installation.

6 GHz Band Support: More available channels and less interference ensure superior connection quality.

High Client Capacity: Supports over 300 simultaneous connections, making it ideal for high-traffic network environments.

Seamless Integration with the UniFi Ecosystem: Full compatibility with the UniFi platform enables centralized network management and monitoring.

Key Features

WiFi Standard: WiFi 7 (802.11be)

Supported Bands: 2.4 GHz, 5 GHz, 6 GHz

Maximum Throughput: 5.8 Gbps (6 GHz), 4.3 Gbps (5 GHz), 688 Mbps (2.4 GHz)

Ethernet Interface: 1x 10 GbE with PoE++

Coverage Area: 140 m² (1,500 ft²)

Maximum Client Capacity: 300+
