UPS 1400VA ACCUPOWER

UPS 1400VA

Περιγραφή

Line Interactive UPS systems are an ideal solution of high quality and low cost, to power supply failure and main voltage fluctuation problems. They are available at a range of 600VA to 3KVA and appropriate to protect PCs, Routers, Servers, Modems, Fax machines, network equipment and generally, devices susceptible to power fluctuation or failure.

Accupower Line Interactive UPS systems are equipped with AVR and provide uninterruptible protection to the power supply of the equipment connected at home or at the office, in a cost – effective way of high quality. In addition, they can provide an autonomous operation of up to 60 minutes (depending on the model and the actual load supported) allowing users to save their files and safely shut down the computer in case of a power cut.

Moreover, Accupower Line Interactive UPS systems come with a software which performs automatic shut down of the computer and monitors operating parameters.

Protection from dips, voltage surges, overcharge and short-circuits

Back up time up to 40-50 min

LED indicators

Microprocessor-controlled to ensure high reliability

Automatic voltage regulator (AVR)

DC start function (cold start) without AC utility power

Auto restart on AC utility power recovery

Telephone / network / fax / modem line protection (RJ45)

Sound alerts in cases of failure

USB port for PC communication.

UPS operation monitoring Software

3 schuko outputs (Isy 1200)

2 schuko & 2 IEC 320 C13 outputs (Isy 2200)

Compact design

Small dimensions

Easy connection

24-month warranty (including batteries)
