UBIQUITI NANOBEM 5AC GEN2

Περιγραφή

Ubiquiti NanoBeam AC GEN2

Ubiquiti Networks launches the second generation of airMAX® CPE (Customer Premises Equipment), the NanoBeam® 5AC Gen 2.

The NanoBeam 5AC Gen 2 directs RF energy in a tighter beamwidth. With the focus in one direction, the NanoBeam 5AC Gen 2 blocks or spatially filters out noise, so noise immunity is improved. This feature is especially important in an area crowded with other RF signals of the same or similar frequency.

The radio and antenna are combined to create a more efficient and compact CPE. The NanoBeam 5AC Gen 2 gets maximum gain out of the smallest footprint.

Providing high performance and an innovative form factor, the NanoBeam 5AC Gen 2 is versatile and cost-effective to deploy.

The second generation devices work under airOS® v8 software - the revolutionary operating system for Ubiquiti® airMAX ac products.
