FORTIAP CLOUD MANAGEMENT
ΓΕΝΙΚΟΣ ΚΑΤΑΣΚΕΥΑΣΤΗΣ

Περιγραφή

FortiAP Cloud is a hosted cloud-based management platform, offering zero touch deployment, configuration management, reporting and analytics for standalone FortiAP deployments. FortiAP Cloud offers a simple, intuitive, easy-to-use interface for managing your wireless that is available from anywhere at any time. FortiAP Cloud can scale from a small handful of APs all the way up to thousands of devices across multiple sites.
Zero Touch Deployment

Initial configuration of access points can be a difficult proposition, often requiring expert staff on site to configure each device individually. FortiAP Cloud with FortiDeploy greatly simplifies initial configuration and onboarding by providing one-touch provisioning when devices are deployed.Highly Scalable
Highly Scalable

Cloud-based model can manage deployments from single digits up to multiple thousands of FortiAPs, and can easily grow with your deployment along the way
Multi-Tenancy

Maintain multi-tenancy for many customers within a single license. Simple Central visibility and access across all tenants. Enable Read-Only customer accounts with unique customer logos on reports.
Highlights

Easy Provisioning — FortiAP network settings are configured through an easy-to-understand UI
Robust Monitoring — Topology views, Port level view, Status monitoring
Troubleshoot — Event Logs, Alarms, and Alerts
Free Option — Basic configuration and 7-days of logs at no charge
Two-factor Authentication — Supports FortiToken for two-factor authentication of user login
Smart APs — FortiGuard-backed UTM services when using the FortiAP-S Smart line of Access Points
Privacy Compliance — Isolated instances for Europe, Americas, and Asia to meet local privacy laws.

Dashboards for Ease of Management

Multiple monitor dashboards offer a view of key statistics for all managed APs, radios, clients, and neighboring networks in your environment.
