UBIQUITI UNIFI VIDEO CAMERA G4-BULLET

UBIQUITI

UBIQUITI VIDEO CAMERA G4-BULLET

Περιγραφή

UniFi G4 Bullet camera has 4Mpx sensor (2688 x 1520, 24fps), lens with fixed focal length about 4mm, viewing angle 86°, IR illumination for night vision, audio microphone and Gigabit port with PoE support. Thanks to the great holder, you are able to direct the camera in all 3 axes.

The camera supports for powering PoE adapter or Switch supports 802.3af standard. Maximum camera power consumption is only 4W!

Software

With the UniFi Video mobile app, you can watch live images on all cameras connected to the NVR. The app is available for iOS and Android.

IR illumination

The camera already has built-in IR diodes for very short illumination (maximum 5-10m depending on the real environment). For the need for quality night vision, we recommend purchasing an external UVC-G4-IRExtender light, which you simply install directly on the camera.
